

“Our customers are our greatest asset.”

FAQ's

Why should I choose a Digitex compatible toner cartridge?

While being extremely economical and environmentally friendly, Digitex products are tested and manufactured in an ISO 9001:2000 facility.

Digitex toner cartridges maintain a success rating of 99% and are proven to perform as well as, or better than their OEM counterpart.

Will a Digitex compatible toner cartridge void my printer warranty?

No. Your printer manufacturer cannot void your machine's warranty for using cartridges other than theirs. An OEM printer warranty will not be voided due to the use of a compatible cartridge product. The HP printer warranty quotes: "The use of a non-HP or refilled toner cartridge alone does not affect either your warranty or any maintenance contract you may have purchased."

Do Digitex compatible toner cartridges last as long as the OEM?

All Digitex products are manufactured to perform equally to the OEM. In some cases, our products have even out-performed the OEM by almost 20%!!!

Can I recycle my empty toner and inkjet cartridges?

Yes! And we encourage you to do so. Digitex can help you to ease the e-waste burden on our environment; please contact us for further information.
